### ➤ Fixed Wireless Phone GSM900/1800MHz

**6-AW**

#### Introduce Product Functions:

- \*GSM900/1800MHz
- \*Lock phone/card/network
- \*Support local, IDD, DDD and ESN calls.
- \*LCD displays operation steps, current time, talk time, etc.
- \*Huge phonebook function
- \*IP Access service
- \*Phone password setting.
- \*Redial and hand free
- \*Wireless signal intensity indicator
- \*11kinds of 8chord ring tone

### ➤ Fixed Wireless Phone GSM900/1800MHz

#### G6-C1 2.4G

##### Introduce Product Functions:

##### Main Function

##### Basset Function:

- ◇ Suits for GSM 900MHz and GSM 1800MHz.
- ◇ Could make local call, mobile call, national and international call.
- ◇ Could display current time, calling time, battery storage, signal strength, etc..
- ◇ Supports redial, hand free, and back dial function.
- ◇ 10 groups of missed call, received call and dialed call. Calling records could be stored or deleted.
- ◇ LCD displays incoming number and out-dialing number.
- ◇ 11 kinds of 8 melodies ring for selection.
- ◇ Lock phone, lock card and lock network function.
- ◇ One basset could be connected up to 4 handsets.

##### Handset function:

- ◇ 2.4 G digital wireless phone.
- ◇ Full duplex talkback for handset to handset and handset to basset. Call Forward function.
- ◇ Adapts jumping frequency technology. Good confidentiality.
- ◇ 100 groups of incoming numbers' memory which could be reviewed or deleted.
- ◇ 10 groups of outgoing numbers' storage which could be reviewed or deleted.
- ◇ Store 100 groups of phone numbers.
- ◇ Low voltage alarm indicator.
- ◇ Calling time calculation.
- ◇ Alarm clock setting.
- ◇ LCD brightness adjustable.
- ◇ 18 kinds of 32 melodies ring for selection. Volume setting.
- ◇ Time setting.
- ◇ 24 bit digital codes redial.

### ➤ Fixed Wireless Phone GSM900/1800MHZ

**G5J-B**

#### **Introduce Product**

G5J-B is newly developed wireless desktop payphone with embedded GSM900MHz/1800MHz wireless communication module, particularly suitable to indoor application. Complied with EN 60950, IEC 950, UL 1950 and CSA 22.2 No. 950 safety standards for GSM BABT/98/6720. (Released on Oct. 14, 1998)

#### **System Functions:**

Local phone calls, DDD & IDD phone calls supported with auto charging  
Free calls for specified numbers  
IP connecting for long distance calls supported  
Redial, free-hand, password setting supported  
High reliability for short message transmission  
Double LCD display for call information checking  
Centralized control by network management system  
Self-failure detection, online test, statistic analysis, failure alarm and reporting supported

#### **System Features:**

Streamlined outline and user-friendly console  
Strong signal with high quality voice transmission  
Menu selection for ease maintenance  
Double security by phone password and start-up PIN code  
In-built charging device for all-in-one design  
Double LCD display for charging information and received messages  
Powerful network management with failure management, system management for call data analysis and devices maintenance

Expandable and scalable  
Wireless signal indicator available  
Multi-antenna compatible  
Plug-in standby battery for shut down by disconnecting power line  
Auto-roaming supported  
MTBF exceeds 10,000 hrs  
High reliability on preventing fraudulent uses

#### **Electric Feature**

Operating Input: 110-220v AC (Plug-in standby battery available)  
Max. Pulse Input Power  $\leq 10W$ , Mean DC Input  $\leq 1.5 W$  (Standby), Mean DC Input  $\leq 3.0 W$   
Standby Duration: 24-48 hrs, Talk Duration: 1-2 hrs

#### **Operation conditions:**

Operating Temperature: -10~40    Relative Humidity: 10%~95%    Atmospheric Pressure: 86~106Kps  
Noise : < =60dB (A)    MTBF: exceeds 10,000 hrs  
Pressure for dialing key: exceeds 500,000 times for 3kg

### ➤ Fixed Wireless Phone GSM900/1800MHz

**G5J**

#### Introduce Product

G5J GSM-900MHz/1800MHz are a pre-paid chip card phone that can be used in any GSM 900MHz or GSM 1800MHz network. It shares the same components of any other GSM payphones, including the main electronic board, customer console and housing. With user-friendly console, simplified operation, streamlined outline and charging device, it is widely applied to enterprises, factories, schools, armies and other governmental institutes as well as some district where is inconvenient to distributing phone line.

#### System Functions:

Applied to GSM900MHz/1800MHz digital mobile communication network

Local phone calls, DDD phone calls, IDD phone calls and free calls by accounting cards

Brief Chinese/English message reminding and display of host number, current time and talk duration etc.

Incoming numbers and dialing numbers display, browse, redial and delete.

Phone network control with calls data statistics, error warning, tariff table setting and etc.

Tariff table updated from phone network.

Free-hand, redial and etc supported

#### System Features:

Streamlined outline and user-friendly console

Strong signal with high quality voice transmission

With wireless signal intensity display

With charging device

With encryption and PIN code double protection

Strong ability against fraudulent use

With roaming function

#### Operation conditions:

Working Temperature: -25~+55°C

Relative Humidity: 10%~95%

Atmospheric Pressure: 86~106Kps

Noise: :: 90dB(A)

110-220V AC power supply (plug-in back-up lithium cell supported)
