➤ Fixed Wireless Phone GSM900/1800MHz or GSM850/1900MHz

Product Special Features

- Two phone no. to access both GSM and PSTN.
- Auto detecting PSTN. Switch to GSM automatically when PSTN is not detected.
- Restricting calls to choose GSM or PSTN. Support call barring.
- Specialized SIM card in case of misuse in mobile phones after decrypt.
- Phone book storing up to 100 pieces of numbers.
- Support barring of incoming and dialed calls and speed dialing.
- Attached small keyboard to input more conveniently.
- 5 seconds prompt to switch to another call by pressing switch key during a talk, without disconnecting the original one.
- Support both PSTN and GSM virtual network function.
- Auto detect PSTN or GSM fault to dial the phone through proper network.
- 128*64 LCD with background light shows five lines of calling information, date and time.
- Support remote network management.
- Support carrier locking.
- Support keyboard locking. User can set up to 10 barred calls.

Product Function

- Prefix IP no. ahead of long distance call automatically.
- GSM900/DCS1800MHz or GSM850/DCS1900MHz dual mode adaptation.
- Receiving and sending short messages.
- Calls records.
- Friendly interface using both text and images.
- Incoming caller ID for both GSM and PSTN.
- Intelligent power management. Detecting the batteries to recharge or discharge automatically.
- Displaying battery level and signal strength.
- 18 types of chord rings
- Internal or external antenna
- Low power design by providing backup batteries.
- Using industrial wireless module.
- 850/1900 MHz frequency optional.

➤ Fixed Wireless Phone GSM900/1800MHz or GSM850/1900MHz

Product Special Features

- Specialized SIM card in case of misuse in mobile phones after decrypt.
- Phone book storing up to 100 pieces of records.
- Records
 1. 20 pieces of answered calls/missed calls and the time
 2. 10 pieces of dialed calls and the time
 3. Number of new coming calls
- SMS
 1. Sending, inquiring, deleting, and receiving short messages with independent keyboard
- Dialing features
 1. 10 pieces of speed dialing calls.
 2. Call back/Redial function
- IP Phone
- Prefix IP number when dialing long distance calls
- Support various new services, such as call forwarding.

Product Function

- Hands free
- Adjust ring volume through volume switch.
- Adjust handset volume through volume adjustment
- Long distance call locking function to lock the long-distance call by a password
- Accounting function to support pulse accounting function (in condition of the network support)
- Voice encryption supporting encryption of voice during a talk
- Data service to provide dial up function
- Support setting of barred calls
- Using industrial wireless module
- 850/1900 MHz frequency optional.

➤ Fixed Wireless Phone GSM900/1800MHz or GSM850/1900MHz

G6-EA

Basic Functions

- 1.Supporting 900/1800M or 850/1900M
- 2.128*64 LCD with background light, showing four lines of calling information, date and time.
- 3.Pre-set area code, IP number, Special service number, and any other head number.
- 4.Privilege setting for international distant and local call-in and call-out.
- 5.PIN code protection for SIM card.
- 6.Large LCD display present time, call time, battery storage, signal intensity and so on
- 7.It can record recent missed, dialed, received phone and find, call back delete in random.
- 8.Friendly interface using both text and images displaying , Chinese and English menu switching .
- 9.Big memory of phone book, can storing 200 phone numbers at least , incoming and out-going call number lists.
- 10.Low power design, Connecting to outer power supply or using backup battery
- 11.Long distance calls locking.
- 12.Support carrier locking.
- 13.Setting date, alarm and calculator
- 14.Promoting voice quality by echo suppressing and digital encryption technologies
- 15.Setting key tones, warn tone, message alert and any key answer functions.
- 16.Call forwarding and incoming caller ID.
- 17.GPRS (optional).
- 18.SMS function (optional)
- 19.Using industrial wireless module

Characteristics

1. Simple operation as normal fixed telephone, good portability and mobility.
2. Rapid network searching, quick response for dialing, high voice resolution quality and harmless low radiation.
3. Adaptive to wide range of voltage with low power consumption.
4. Equipped battery for back up when short of external power supply.

➤ Fixed Wireless Phone GSM900/1800MHz or GSM850/1900MHz

G6-G

Basic Function

1. Supporting GSM mobile communication network 900/1800M or 850/1900M.
2. Double LCD, convent for using.
3. Billing function, the LCD will show the talk time and sum according to the rate.
4. With billing indicator function.
5. Subtotal function, the LCD can show the total sum after several calls.
6. Searching the call list function, you can search about 88 PCS call records, including number, begin time, how much time, and sum.
7. With redial, hand-free functions.
8. Barring call function.
9. Network management function, you can set can change rate parameter and phone parameters.
10. Searching total sum function, you can search the total day sum, month sum and total sum.
11. Adjusting the volume during a conversation.
12. With the back-up battery, you also can go on the talk although it is power off.
13. Using industrial module.

Technology Parameter

Size: 225*210*80mm (L*W*H)

Weight: About 1 Kg

Mounting: Horizontal way

Working Power: AC 220V DC 5V 1000mA

Environmental Temperature: -10°C~40°C

Humidity: 10%~95%

Atmospheric Pressure: 86~106kpa

Power consumption: Static ≤30 mA

Standby Time: more than 36H

Talk Time: 2H

(Annotation: The standby time and the talk time are according to the local network.)

➤ Fixed Wireless Phone GSM900/1800MHZ or GSM850/1900MHZ

SG2008GS

Basic functions:

- 1.Suitable for the GSM850MHZ or 900MHZ or 1800MHZ or 1900MHZ wireless network; with the number provided by the mobile carrier (the same as the SIM card number), the phone can be used to make local calls, DDD and IDD;
- 2.Support prepaid and postpaid mode, double LCD, statistics function as per year, month and day;
- 3.Support caller ID;
- 4.Preset local area code, IP prefix, special service number, local number segment;
- 5.Support authority assignment for local call, DDD, LDD;
- 6.Support SIM card locking, keypad locking, phone locking, network locking;
- 7.Double LCD: display automatically the name of the network carrier, signal strength, battery status, time and date according to the local network;
- 9.Large memory of phone book to store the incoming and outgoing calls;
- 10.Support PC fax (optional);
- 11.Support GPRS (optional);
- 12.Support network management function (optional);

Main characteristics:

- 1).Contemporary housing to meet the demand for both household and business use;
- 2).Excellent voice quality;
- 3).Fast network searching and dial-up responding; the high gain antenna is highly sensitive and without any radiation to human;
- 4).Auto identifying of the local and long distance call;
- 5).The phone is portable and can be used movably;

Specifications:

- 1).Make use of the international standard GSM digital mobile network;
- 2).Working frequency: GSM850MHZ or 900MHZ or 1800MHZ or 1900MHZ;
- 3).Dimension: 200*202*70 MM;
- 4).Weight: about 1.35 KG;
