➤ Mail Server

Detailed Product Description:

SG Mail Server series (MS) is robust solution with comprehensive features to provide complete email and collaboration package with extensive security measures. SG MS supports SMTP, POP3, IMAP, Web-mail, LDAP, Multiple Domains, SMTP authentication, Spam Protection, Anti-virus, Mail Relay, SSL/TLS security, RBL, SPF, Spam Assassin, Network Storage, Remote Access, Web-based Administration, Mail List, Archiving and Backup.

Features:

Easy Deployment

Highly acclaimed for its ease of deployment, SG MS comes with a wizard for setting up basic features such as the administrative account, the primary domain, and the location of the store directory.

Supports unlimited accounts;

Supports SMTP authentication. Useful to protect your mail server from unauthorized use;

As we mentioned above, it is fully functional mail server: it relays the messages directly to Mail exchangers, bypassing your ISP.

Has built-in web interface, which allows users to check mail using any web browser from anywhere in the World;

Has password protected Administration mode;

Supports distribution lists; Supports basic filters;

Unlimited message size

Can listen on single IP address, rather than all addresses available on your computer;

Administrator can control the server, and do the maintenance of users;

Users can access their accounts: read and send email, change their own settings;

Has "true" support of multiple domains - you can create accounts with the same name, which belong to different domains;

Supports multiple IP homes (virtual domains);

Has built in mailing list server;

Allows setup of domain administrators - users who can change domain related information via the Web interface;

Filtering of mail according to IP addresses of server which attempts to relay mail to local users;

Supports advanced anti-spam features:

Trusted and banned IP addresses

DNSBL - checking of IP addresses, listed in popular DNS based databases, such spam cop, ORDB, and so on;

Sender Policy Framework (SPF);

Gray listing;

White listing;

Sender address verification - validation with sender servers;

Supports server extensions - plugins, created by users, which do custom mail processing;

Web interface supports multiple folders.

Mail Server: M50/M100/M200/M500/M2000/M5000

Specification:

Dimensions (L*W*H) (mm) : Half-1U Rack or 2U Rack

Interface/Data Rate: LAN 10/100Mbps (RJ-45)*1; WAN 10/100Mbps (RJ-45)*1 standard up to max. 3 interfaces of 10/100/1000Mbps, LAN*1 WAN*2 (RJ-45)

Hard Drive: 160G standard up to max. 320G *2 (RAID 5)

Data Throughput: 30M standard up to max.3000M

Max. Num Connections: 20,000 standard up to max. 3,000,000

Mail Account Num: 20 people standard up to max. 5000 people

	M50	M100	M200	M500	M2000	M5000
Rack	2U	2U	2U	2U	2U	2U
