C5-B

Introduce Product

C5-B CDMA-B Commercial Phone is a CDMA technology desktop wireless communication terminal device developed by S.G. INTERNATIONAL GROUP H.K. LTD... With user-friendly console, simplified operation, streamlined outline, Iso 9000 high-quality control, C5-B CDMA will bring you enjoyment of communicating.

System Functions:

Applied to CDMA-800MHz digital mobile communication network, support IS-2000, IS95A/B.

Local phone calls, DDD phone calls, IDD phone calls, Mobile phone calls and free calls supported. Also support 193 account cards, 17910/17911IP card

Support CDMA 20001X, 115.2Kbps speed (only HWCD888 (5) CDMA-B support) ; Brief Chinese message reminding and display of host number, current time and talk duration etc.

Incoming numbers and dialed numbers display, browse, redial and delete.

Free-hand, redial and etc supported

Receiving both Chinese and English messages

System Features:

Streamlined outline and user-friendly console

High quality LCD with backlight supported

Strong signal with high quality voice transmission

With Chinese menu, easy to operate

With wireless signal intensity display

With roaming function

Low rate of failure

Working between -25°C ~+55°C

Power Supply

110-220V AC power supply (Alternative back-up power supply: Ni-Cd battery or Ni-H battery)

Operation conditions

Working Temperature: -25°C ~+55°C

Relative Humidity: 10%~95%

Atmospheric Pressure: 86~106Kps

Noise: 60dB (A)

ICT8-A

Introduce Product

ICT8-A is a kind of wire-line payphone based on intelligent network platform management, which is newly presented by S.G. INTERNATIONAL GROUP H.K. LTD. Through intelligent network platform centralized management, auto-dialing, account balance and other functions can be effected.

System Functions:

- IC card for intelligent network supported
- Accounting card (300/200/201/IP) supported
- Auto-dialing accounting number and password supported
- Free calls as 110, 119, 120, and 122 supported.
- Card write & read function supported
- Four line LCD screen display for customer guidance
- Auto-failure detection and warning payphone network management center.
- Outdoor Intelligent Platform Payphone

System Features:

- Charging and data protection based on intelligent network platform, high safety data.
- Online encrypted identity validation against fraudulent use to the core.
- Online real-time charging with account check after talk.
- High security for calls data based on intelligent network management.

Operation conditions:

- Working Temperature: -25~+55℃
- Relative Humidity: 10%~95%
- Atmospheric Pressure: 86~106Kps
- Noise: ≤90dB(A)

ICT9

Introduce Product

ICT9 is a kind of wire-line payphone based on intelligent network platform management, which is newly presented by S.G. INTERNATIONAL GROUP H.K. LTD. Through intelligent network platform centralized management, auto-dialing, account balance and other functions can be effected. It is completely accorded with general rules of YDN09-1998 National Integrated circuit (IC) payphone system.

System Functions:

Local phone calls, DDD phone calls, IDD phone calls by IC cards

Free calls supported.

Accounting cards as 300/200/201/IP supported

Brief Chinese/English message reminding and display of host number, current time and talk duration etc.

Redial, follow-on-call, card-change and coin-insert and etc. functions supported

Support customer-defined calls limit

Tariff table updated by intelligent payphone network

Auto-failure detection and warning the payphone network management center.

System Features:

Intelligent coin-reader against any counterfeit money

Counterfeit money warning setting supported

Super ability against crude operation or vicious damage.

High reliability with calls records saved in flash

Charging respectively from IC card and coin.

Charging respectively through IC card and coin.

Operation conditions:

Working Temperature: -25~55℃

Relative Humidity: 10%~95%

Atmospheric Pressure: 86~106Kps

Noise: ≤90dB(A)

ICT2-C

Introduce Product

ICT2-C serial payphones are indoor payphones, which is especially suitable for public payphone booth on watch and other places such as hotels, airport waiting room and supermarket.

System Functions:

Local phone calls, DDD phone calls, IDD phone calls by IC cards and coin.

Free calls supported.

Accounting cards supported

Brief Chinese/English message reminding and display of host number, current time, credit balance and talk duration etc.

Redial, Follow-on call, card change and Language functions supported

Support customer-defied calls limit function

Charging Rate can be updated from payphone management network

Auto-failure detection and warning payphone network management center.

System Features:

High quality with reasonable price

Power-saving with regular phone line

High reliability with calls data saved in flash

Charge from coin

Counterfeit money warning available

Calls data can be browsed through payphones

Operation conditions:

Working Temperature: -10~40°C

Relative Humidity: 10%~95%

Atmospheric Pressure: 86~106Kps

Noise: ≤90dB(A)

➤ Fixed Wireless Phone Public Commercial Phone

ICT1

Introduce Product

ICT1 IC payphone is an intelligent terminal phone which has been interfaced with payphone management network system and conforms to the provisions in general rules of YDN09-1998 National Integrated circuit (IC) payphone system. Under any standard circumstance this terminal can be applied on all legal IC card for calls, especially for outdoor use.

System Functions:

Place local phone calls, DDD phone calls, IDD phone calls, automatic billing & charging.

Place calls by using accounting cards

Supply special (limited) phone services free of charge

Lock restricted phone calls

Receive incoming calls

Card-change function

Redialing & conversation termination function

Brief Chinese/English message reminding

Support centralized control from management center.

System Features:

Headset built by high-strength plastic, cord protected by spiral rust-free steel and its stretch force is above 120KG. Special process treatment ensure public phone terminal water/moisture resistance

Big LCD window, Chinese/English display (4 lines with 8 Chinese characters each line). Abundant message (including local phone No., card accounting balance, card-change, take card reminding, incoming call reminding etc.)

Phone line power supply, outside power supply is not required. Backlight function supported

8 functions of preventing fraudulent use of phones, excellent performance of anti-emulation card

Encrypted memory and power-down protection are available

High reliability with calls records saved in flash

Software online update by network system is available

Compatible with accounting card payphone and auto-dial function is optional

Auto-failure detection and warning payphone network management center.

Super ability against crude operation or vicious damage.

Supply online setup, online test and specialty test function for easier maintenance.

Operation conditions:

Working Temperature: -25~+55°C

Relative Humidity: 10%~95%

Atmospheric Pressure: 86~106Kps

Noise: >=90dB (A)

C6

Introduce Product

C6 CDMA accounting card CDMA Payphone is a high technology public device developed by S.G. INTERNATIONAL GROUP H.K. LTD. CDMA has many merits such as high connectivity, clear tone, high usability of frequency, low power consume etc. Roaming function available.

System Functions:

Applied to CDMA-800MHz digital mobile communication network

DDD phone calls, IDD phone calls

Special calls supported such as Free calls, emergency calls(110, 119, 120, 122)

Brief Chinese/English message reminding and display of host number, current time and talk duration etc.

17910,193300 services supported

Redial, Follow-on call, Language selection and etc. functions supported

System Features:

Streamlined outline and user-friendly console. Ergonomic design adopted

Waterproof, moisture proof, dustproof, Reliable structure against crude operation

High quality LCD with backlight supported

Strong signal with high quality voice transmission

Simplified operation, Brief Chinese/English message reminding available

Easy to extend

Net monitor software that can monitor and manage remote wireless mobile public phone devices installed. Easy maintain, management, high security

With wireless signal intensity display

Multi antenna matched

Roaming function available

Strong ability against fraudulent use

Redundant IC interface, accounting IC card function can be extended

Prepaid IC card can be extended. Charge fee and IC card data can download from net monitor center. Fee deduct from terminal available

Malfunction is rare

Electric Feature

Current consumption: stand by <20mA, calling <300mA

Power Output: 2W, 900M; 1W, 1.9G SIM card interface:3V

Stand by: 72 hours (full charged) continuing calling>8 hours (full charged)

Operation conditions:

Working Temperature: -25~+55 Relative Humidity: 10%~95%

Atmospheric Pressure: 86~106Kps Noise: >=60dB (A)

➤ Fixed Wireless Phone Public Commercial Phone Communicator

Family-school communicator-02

Introduce Product

- Conforms to the criteria of telecommunication industry which was issued by the Information Industry Bureau in China. The name of the criteria is “short message technology specification of fixed telephone network” .(YD/T 1248-2003)
 - Could receive and store ID numbers of 6000 students. Every ID number is correlated with name, student’s number, class, grade, and 3 intimate telephone numbers.
 - Could receive and store 2800 pieces of left messages. Each message includes at most 60 Chinese characters
 - Students could use wireless IC card to send out “None Mishap”, “Notifying” and etc short message to the specific information phone such as PHS or mobile phone.
 - Students could use wireless IC card to dial out the preset intimate telephone number and look over the left message.
 - Teachers could use wireless IC card to send out short message to parent’s information telephone such as PHS or mobile phone. Teachers could dial teacher’s 800 telephone number.
 - Teachers could use wireless IC card to send out the “left message” to every individual student or to all students in the class.
 - Large LCD screen. Embedded GBK character library. Could display various kinds of Chinese and English message.
 - Embedded Flash of large capacity to guarantee all information of students not to lose after AC power supply is off.
 - Adapts intellectual Quentin input method to input Chinese information. Lot of frequently-used idioms embedded.
- Convenient and practical
- Spare environment protective battery is available for the purpose of power supply. Guarantee the phone to keep working for 2 hours after it lost AC power supply.
 - Embedded accurate clock circuit to guarantee time accuracy when the telephone is working.
 - Dial out emergency number without charge. Could set up 200 telephone service.
 - II class anti-thunder protective design. Guarantee safety and reliability of the phone.
 - Prevent the coexisted phone from furtive dialing

“Family-School Communicator” -----Comprehensive Education Information Service System

“Family-School Communicator” Comprehensive Education Information Service System is an increased value telecommunication service system which is based on the Comprehensive Information Service Platform (SNSC) of the fixed telephone network. It mainly consists of 4 parts, which are Education Information Management System (ICP), “Family-School Communicator” intellectual telephone, wireless IC card and information phone such as PHS or mobile phone.
