Solutions

- Solution for SME
 - for International Trade
- Telecom
- Education

SG's value-added expertise to Small & Medium-sized Enterprise (SME)

Challenges Facing the SME

In the past decades, competitive business environments and the dynamic nature of the world of IT create constant and difficult challenges for information technology professionals. Some of these challenges include: efficient systems management, quality of the end user experience, impenetrable data security and compliance with legal and regulatory requirements. These challenges must be met while operating under continuing pressure to reduce IT expenditure.

However, most of traditional industry IT solutions are difficult to implement and they are costly to equip and maintain. Problems are therefore faced to businesses, especially Small & Medium-sized Enterprise (SME), as such type of firm is launched with little capital and limited technical supports.

In order to help SME to overcome those difficulties, SG has introduced an innovated product ---- Multi-Host--- All-in-One solution to Centralize, Simplify and Optimize IT Infrastructures.

Aims:

- Reducing Initial Investment & Feeding Cost, Increasing Performance
- Provides Extensive Network Protection
- Systematic Network Management, Enhance Enterprise Productivity

Systematic Network Management, Enhance Enterprise Productivity

Network Behavioral Management involves a distributed database, auto polling of network devices, and high-end workstations generating real-time graphical views of network topology changes and traffic. Such service employs a variety of tools, applications, and devices to assist human network managers in monitoring and maintaining networks.

Solution providers like SG can implement management systems that offer tools for traffic shaping, capacity management and account control that is automated and highly cost-efficient. SG's integrated management center offers comprehensive controls for a more functional and flexible management platform.

Deploying the SG network behavioral management system provides IT administrators with performance management, topology management, accounting management, security management, fault management, configuration controls and 24/7 dynamic network status analysis.
